PROFESSIONAL SUMMARY

Computer Science Engineering graduate (2026) from GRIET Hyderabad specializing in full-stack development with the MERN stack. Experienced in building end-to-end web applications, responsive React interfaces, secure Node.js/Express REST APIs, and MongoDB-backed systems. Strong foundation in Data Structures and Algorithms, Object-Oriented Programming, and Database Management Systems, with the ability to design, develop, and deploy production-ready software independently. Seeking an entry-level Software Engineer or Full-Stack Developer role.

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), C, Python, SQL
- **Frontend:** React.js, Redux Toolkit, HTML5, CSS3, Tailwind CSS, Vite, Responsive Design
- **Backend and Databases:** Node.js, Express.js, REST APIs, JWT Authentication, MongoDB, Mongoose, MySQL, NoSQL
- **Tools and Platforms:** Git, GitHub, Postman, Vercel, Render, VS Code, MS Office
- **Core CS Concepts:** Data Structures and Algorithms (DSA), Object-Oriented Programming (OOPS), DBMS, Operating Systems, Computer Networks

PROJECTS

Learning Management System (LMS) — Full-Stack Web Application

December 2024 – February 2025 | **Tech Stack:** React.js, Redux Toolkit, Node.js, Express.js, MongoDB, Tailwind CSS, Vite

GitHub: <https://github.com/golianupreddy/LMS-Learning-Management-System>

Live Demo: <https://lms-learning-management-system-beryl.vercel.app/>

- Architected and developed a full-stack e-learning platform enabling students to browse, enroll in, and track progress across online courses.
- Implemented JWT-based authentication and role-based authorization to protect student and instructor routes.
- Built a responsive, mobile-first React interface with Tailwind CSS and centralized state management using Redux Toolkit.
- Designed RESTful CRUD APIs with Node.js and Express.js, integrating MongoDB through Mongoose schemas for courses, users, and enrollments.
- Optimized database queries for concurrent session handling and deployed the client on Vercel and backend services on Render.

E-VOTING SYSTEM USING BLOCKCHAIN TECHNOLOGY

Academic Major Project | **Tech Stack:** Blockchain, Cryptographic Hashing, Node.js, JavaScript

GitHub: <https://github.com/golianupreddy/blockchain-voting>

Live Demo: <https://decentralized-voting-system-one.vercel.app/>

- Designed an electronic voting system prototype using blockchain architecture to prevent double voting and maintain vote integrity.
- Implemented voter authentication protocols and recorded verified ballots as immutable entries within a distributed block structure.
- Developed and tested transaction validation mechanisms to support transparent, tamper-resistant audit trails and accurate vote tallying.

EDUCATION

Gokaraju Rangaraju Institute of Engineering and Technology (GRIET), Hyderabad

B.Tech in Computer Science and Engineering | CGPA: 6.89/10 | Expected 2026

Gouthami Junior College, Hyderabad

Intermediate (MPC), TSBIE | Marks: 508 (B Grade) | March 2021

Shastra High School, Hyderabad

Secondary School Certificate (SSC), BSE Telangana | CGPA: 8.2/10 | March 2019

CERTIFICATIONS AND KEY COMPETENCIES

- **NPTEL Certification:** Data Science for Engineers — IIT Madras | June 2026
- **Key Competencies:** Full-Stack Development, REST API Design, Database Management, Problem Solving, Troubleshooting and Debugging
