PROFESSIONAL SUMMARY

Computer Science Engineering graduate (June 2026) from GRIET Hyderabad specializing in full-stack web development with the MERN stack. Hands-on experience in architecting and delivering end-to-end web applications, ranging from responsive React user interfaces to secure, scalable Node.js/Express REST APIs backed by MongoDB and MySQL. Grounded in Data Structures & Algorithms, Object-Oriented Programming, and DBMS, with a verified record of independently building and deploying production-ready cloud software. Seeking an entry-level Software Engineer / Full-Stack Developer role.

PROJECTS & EXPERIENCE

Learning Management System (LMS) – Full-Stack Web Application

Dec 2024 – Feb 2025

Tech Stack: React.js, Redux Toolkit, Node.js, Express.js, MongoDB, Tailwind CSS, Vite

GitHub: <https://github.com/golianupreddy/LMS-Learning-Management-System>

Live Demo: <https://lms-learning-management-system-beryl.vercel.app/>

- Architected an end-to-end e-learning platform enabling students to explore courses, enroll seamlessly, and monitor real-time progress.
- Implemented secure user authentication and role-based access control (RBAC) via JSON Web Tokens (JWT) for student and admin pathways.
- Constructed responsive UI components using Tailwind CSS and managed centralized global state architecture with Redux Toolkit.
- Engineered scalable RESTful CRUD APIs in Node.js/Express with optimized MongoDB queries through Mongoose models and deployed on Vercel & Render.

Decentralized Voting System Using Blockchain Technology

Academic Major Project

Tech Stack: Solidity, Web3.js, Blockchain, Cryptographic Hashing, Node.js, JavaScript

GitHub: <https://github.com/golianupreddy/blockchain-voting>

Live Demo: <https://decentralized-voting-system-one.vercel.app/>

- Engineered an electronic voting prototype on decentralized smart contracts to prevent duplicate voting and guarantee cryptographic ballot integrity.
- Implemented voter verification protocols and recorded validated votes as immutable blocks on a distributed blockchain architecture.
- Built intuitive dual-panel dashboards for Election Administrators and Voters with transaction status tracking and real-time tally audit trails.

EDUCATION

Gokaraju Rangaraju Institute of Engineering and Technology (GRIET)

June 2026

B.Tech in Computer Science and Engineering | CGPA: 6.89/10

Gouthami Junior College

March 2021

Intermediate (MPC), TSBIE | Marks: 508 (B Grade)

Shastra High School

March 2019

Secondary School Certificate (SSC), BSE Telangana | CGPA: 8.2/10

SKILLS & CERTIFICATIONS

Languages: JavaScript (ES6+), C, Python, SQL

Frontend: React.js, Redux Toolkit, HTML5, CSS3, Tailwind CSS, Vite, Responsive Design

Backend & Databases: Node.js, Express.js, REST APIs, JWT, MongoDB, Mongoose, MySQL, NoSQL

Tools & Core CS: Git, GitHub, Postman, Vercel, Render, VS Code, DSA, OOP, DBMS, Operating Systems

Certifications: NPTEL Certification: Data Science for Engineers — IIT Madras (November 2023)
